Continuation of 3. NOTE: specifically, the claims are amended to accept "zero" or more modules or container..

Continuation of 11. does NOT place the application in condition for allowance because: The Examiner does not see where in paragraphs 10-12 support can be found for a framework "related to a data-level to an application-level relationship", where only a formatting of frames according to a CSS is defined. The Examiner does not see where in paragraph 50 support exists for shrinking "after creating an instance of the at least one navigation module that associates the same data type between the data level and the application level", where only a shrinking when no module is defined is presented.
